

NOISEGARD DENSE VINYL BLOCKER (#NGDVB-40)

NoiseGard Dense Vinyl Blocker (DVB) is a 40 oz/sy, polyester-reinforced vinyl fabric used to reduce excess sound transmission. It can be customized to fit any fence system, and modified to include a number of different top, side, and bottom closures and fencing attachments.

DVB can also be used as dividers where reducing the impact of noise on adjoining areas is needed.

The material offers an pass-through reduction of up to 12 dB.

It is manufactured to include anti-microbial, anti-fungal and anti-mildew admixtures, and is formulated to include UV inhibitors for outdoor use.

Available in an array of colors, our heavy vinyls can also be manufactured as nearly clear curtains, or with clear vinyl windows.

SPECIFICATIONS:

Base Fabric	10 oz. polyester
Type of Coating	E-PVC
Thickness	0.0433 inches
Weight	40 oz/sy
Tensile Strength	920/870 lbs/2"
Tear Strength	132/132 lbs
Sizes Available	Up to 58" wide; any length
Tolerances	+/-10% from lab tested average
